

For the occasion of opening of the Israeli MTS market, FMR launches a commercial campaign in Israel. The result is a distribution agreement with the local company Modelity Technologies, that handles distribution and support of FMR's products. Thanks to this agreement FMR acquires 9 new customers for the automatic pricing and hedging system FMR pricing system, developed with the collaboration of List Group.

The peculiarities of dealing with small amounts of liquidity and the development of the Israeli market, along with the sophistication of the dealers, are a new challenge for FMR, who are providing its customers personalized financial instrument specifically for the Israeli market.
